Intel Xeon X5260/ 3.33 GHz, 6 MB L2, 1333 MHz FSB, 80 watt

* When ordering two processors, the second processor must be the same as the first. Intel processor numbers are not a measurement of higher performance. Processor numbers differentiate features within each processor family, not across different processor families. See: http://www.intel.com/products/processor_number/ for details. Intel® 64 Architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers, and applications enabled for Intel 64 Architecture. Processor will not operate (including 32-bit operation) without an Intel 64 Architecture -enabled BIOS. Performance will vary depending on your hardware and software configurations. See: http://www.intel.com/technology/64bitextensions for more information. Quad-Core and Dual-Core are new technologies designed to improve performance of multithreaded software products and hardware-aware multitasking operating systems and may require appropriate operating system software for full benefits; check with software provider to determine suitability; Not all customers or software applications will necessarily benefit from use of these technologies.

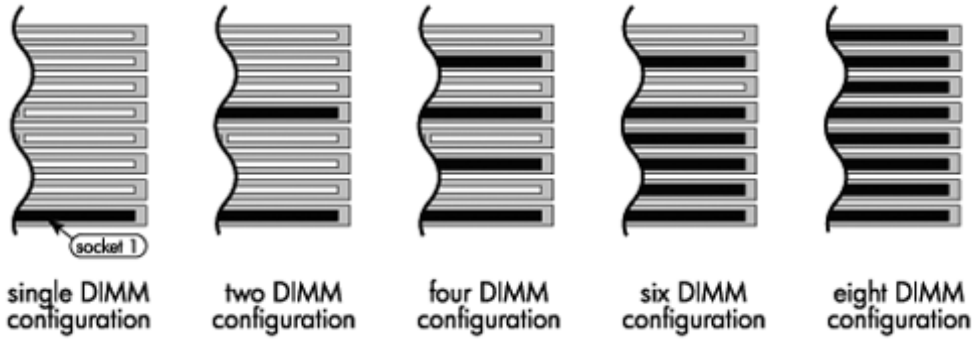
Intel 5400X Chipset

Requires PC2-5300F DDR2-667 ECC Registered Fully Buffered DIMMs.

The Intel 5400chipset supports ECC Registered DDR2 667 MHz FB-DIMMs only. The motherboard has 8 DIMM slots. Use only fully buffered, PC2-5300F DIMMs. Match multiple DIMMs by size and type. Use HP memory only.



If using only one DIMM, install in socket 1 (bottom DIMM slot when rear inputs/outputs of motherboard are facing left). If using 2 DIMMs, install in sockets 1 & 5, matched by size and type. For more than two DIMMs, pairs MUST be matched by size and type in sockets 1 and 3, 5 and 7, 2 and 4, and 6 and 8; this may require moving the DIMM in socket 5 to socket 3.

MAXIMUM MEMORY

Supports up to 32 GB of DDR2 FB-DIMM SDRAM.

Optional Floppy Drive	1	3	FDD
5.25" storage drive bays (position 1 drive bay is limited to 198 mm depth when optional smart cover solenoid lock is installed; position 2 drive bay can be converted to an internal 3.5" 3rd hard drive bay with optional bracket)	2	1, 2	SATA
3.5" storage drive bays with acoustic dampening rail assemblies	2 (3)	4 (and 2, for 3rd drive using optical bay)	SATA or optional SAS Factory Integrated RAID*
Or configure three 2.5" drives in the chassis instead of two 3.5" drives.	3	4	These are SAS drives and require the SAS controller. SATA and SAS may be mixed only in a Windows configuration and with the inclusion of an optional SAS controller. Here are the rules for mixing hard drives: 1. The boot/data drive must be

SATA to load before any SAS drive.

2. Any size or speeds may be chosen for drives
   In non-mixed Microsoft Windows and Linux systems, rules 2 & 3 apply.

Configure-to-order RAID configs must all have the same size/speed hard drives.

Up to 6 channels of SATA can be supported natively.

***** Factory Integrated RAID 0 Configuration (Striped Array) and RAID 1 Configuration (Mirrored Array) requires 2 hard drives with identical speeds, capacity and interface. Specific user-configured hardware SAS RAID configurations are supported on this system with Linux. Please visit: http://www.hp.com/support/linux_hardware_matrix for details.
