DISPLAY SOLUTIONS FOR EVERY APPLICATION

SIGNAGE SOLUTIONS

PERFORMANCE YOU CAN TRUST

NEC stands for product quality and design perfection with a reputation for reliability and an enviable pan-European support infrastructure to back it up. Installing an NEC display means you can trust in our equipment and our company culture. Designed for long term operation, NEC displays and projectors incorporate innovative designs, high quality panels and components and go through demanding quality assurance levels; displays ready for the most demanding mission critical applications, out of the box.

THE WIDEST PORTFOLIO OF DISPLAY SOLUTIONS OF ANY SUPPLIER

Today NEC boasts a comprehensive range of Desktop Displays, Large Format Displays and Projectors, with a model for almost any application from the largest venues or public places to offices and smaller classrooms. NEC is one of the world's largest IT companies, with the display division operating 13 local sales and support offices across Europe, Middle East and Africa.

No matter what your application, NEC Display Solutions has the widest display portfolio on the market and the perfect visual solution for almost any need.

EXPLORE NEW LIMITS

BLUE WORLDS

SOLUTIONS FROM A MARKET LEADER

NEC offers an extensive range of digital display applications and innovative software solutions. These are geared to the growing demands of enhancing awareness, communication, productivity, analysis and enjoyment in all major vertical sectors.

NEC's visual display solutions are used to create an interactive visual experience across: corporate environments, airport/transportation, leisure/museum, retail, quick service restaurants, energy/utility, rental and staging, Digital-out-of-Home (DOOH), media/colour, control room and education.

AVIATION AND TRANSPORTATION

Zurich Airport,
Zurich, Switzerland

With ever increasing national and international travelling, operators are investing in new technology to meet increases in the levels of promotion and customer service needed to remain competitive. Emerging new non-operational revenue streams include a host of new context aware and touch solutions that allow more accurate advertising.

Display Solutions help communicate with passengers at each stage of their journey, from booking through to departure, not only improving the customer experience via way-finding and critical information but also providing advertising and loyalty opportunities.

CINEMA DISPLAY SOLUTIONS

10mm LED Outdoor at ODEON Theatre,
London, United Kingdom

Cinema is not only about watching a movie on a big screen, today it's a social night out with a partner or friends. Watch a preview of the 'Coming Soon' Blockbusters or take time to enjoy a beverage or burger at a food bar whilst taking in the digital visual information around you before stepping into the theatre where you will experience a new standard in reality with 4K 3D playback.

Alternatively view live events in an audio visual installation projection environment or open air cinema that has all the atmosphere of being at the event itself.

CORPORATE

ITV
London, United Kingdom

As electronic equipment becomes ever smaller and more powerful, computers used in professional offices shrink in size and increase in performance. The huge tower PC is now a thing of the past, being replaced by much smaller thin client and ultrasmall form factor PCs and laptops.

However the display screen itself has radically grown in size and resolution. Hot desking and video-conferencing are now very common within the professional office. The ability to adjust the display and desk to suit an individual's requirements is an important factor in providing a safe and comfortable working environment.

Government requirements and corporate aspirations for the reduction of power consumption and Carbon footprint have had a high impact on IT and AV investments where innovative ECO features are increasingly demanded. Businesses are looking for new ways to increase productivity whilst reducing costs.

DOOH

Digital-out-of-Home (DooH) advertising is a market that is growing rapidly. Operators of digital signage networks, location owners, media agencies and brands are looking for more dynamic solutions and methods to deploy applications that are driven by market and users' needs.

On the bottom line, media owners monetise viewings irrespective of the medium used, allowing multiple avenues for viewing. The digital format offers huge benefits to all, such as the ability to provide topical, moving content in a timely, targeted fashion, with interactivity allowing deeper engagement whilst providing a richer experience for the audience.

Content is becoming more engaging with advances in brightness, resolution and communication that allow almost any public 'out of home' space to become a link to targeted audiences for paying advertisers.

VUKUNET

VUKUNET is an internet-based AdServing platform that connects all DooH media networks in order to simplify planning, buying and the delivery of an advertising campaign.

Developed by NEC it forms part of a market leading suite of digital signage products and services.

Vukunet

For more information visit
www.vukunet-nec.com

Strategically placed monitors in EDEKA supermarkets show 'Brigitte' ads via the VUKUNET system directly where purchase decisions are made.

For more information about this installation please visit vukunet-nec.com

ENERGY AND UTILITY

Brand control rooms,
Deventer, The Netherlands

Providers have to face the constantly growing demand for energy. Monitoring their distribution and production 24/7 is crucial for every Energy & Utility provider and they demand therefore the best performance available from 'Display Technologies', used for monitoring over extended periods of time.

EDUCATION

Edge Hill University,
Lancashire, United Kingdom

The use of technology in the classroom is now widely embraced by schools across Europe and it is recognised that investments in the right technology directly improves class results. There is no substitute for good teaching and engaging subject matter but interactive and collaborative tools can go a long way to enhancing the content helping to improve engagement and concentration levels, by making learning more fun for students, whilst giving more freedom to teachers to be creative.

There are numerous new builds and refurbishments in Government Programmes whilst Academies and Universities are investing to attract fee paying students from home and abroad.

Recognising that ICT plays a huge part in enhancing the student experience, universities are installing digital signage and videowall solutions in foyers, libraries, classrooms, cafeterias and training areas.

LEISURE AND MUSEUMS

As we place high value on our Leisure and Entertainment time in our day to day lives, creating an immersive experience with display technology is a key objective for many organisations as they seek to make their product or service stand out and connect with their customer base.

Content providers in particular need to get their messages across and stepping up the resolution to 4K is one of the enablers that will capture the attention in the coming years.

QSR/RESTAURANTS/CATERING

Coca-Cola booth at CineEurope 2014
Barcelona, Spain

The move to 'Digital Menu Boards' in the Fast Food Industry means instant and easily updated digital information for menu prices or choices, special offers or for entertainment purposes.

Busy restaurants represent some of the toughest locations for display installations. Grease, dust, particles and foremost heat are the main challenges in such an environment and demand for high quality equipment with advanced heat management, protected glass and many more features are vital to help to create a "feel good" experience for all customers.

RETAIL

Digital displays are now commonplace in retail stores, shopping malls and high streets. Advertising using video rather than static posters is highly beneficial delivering to cost savings whilst allowing increased versatility of content.

The enormous benefits gained through attracting, directing and focusing the revenue generating potential of consumers, means that retailers are constantly look for new, eye-catching solutions, with ever more sophisticated users demanding more interaction from displays.

Natural competition between retailers means wider and more impressive installations are increasingly common with displays playing a major part in a stores public face. Partner expertise can play an essential part in making the installed display estate effective in increasing business and generating more activity.

"ZeitRaum" (TimeSpace) is an interactive art installation the Ars Electronica Futurelab designed for the new terminal at Vienna International Airport. It creates real-time interpretations of arriving and departing flights. "ZeitRaum" consists of a series of stations that accompany departing passengers on their way to their gates.
